Document 1: JP, 2000-350267, A (Matsushita Electric Industrial Co., Ltd.), 15 December, 2000 (15.12.00)

Document 2: JP, 11-215175, A (Brother Industries, Ltd.), 6 August, 1999 (06.08.99)

Document 3: JP, 7-86981, A (Nippon Hoso Kyokai), 31 March, 1995 (31.03.95)

Document 4: JP, 7-245574, A (Nippon Hoso Kyokai), 19 September, 1995 (19.09.95)

Document 5: JP, 2000-92009, A (Sony Corp.), 31 March, 2000 (31.03.00)

Claims 1-12

Document 1 describes that low-rate data is transmitted by CDMA and high-rate data by HDR.

Document 2 describes that the transmission rate is changed in the same bandwidth by changing the pread rate.

Document 3 describes that low-rate data is transmitted by means of spread modulation and high-rate date by means of non-spread modulation.

Document 4 describes that, in using OFDM and CDMA that have the same bandwidth, motion image data is transmitted by means of OFDM, and still image data and low-bit-rate motion image data by means of CDMA.

Document 5 describes that low- to high-rate transmissions are performed in the same bandwidth by using the null symbol.

However, the constitution wherein, on the receiving side, low-rate data that has been spectrum-spread and high-rate data that has not been spectrum-spread are distinguished from each other by means of checking whether demodulated signals can normally be reverse-spectrum-spread, is not described in any of the documents and is not obvious.
